DETAILED ACTION

This Office Action is in response to the filing of the application on June 30, 2003.

Accordingly, claims 1-29 are pending in the application.

Allowable Subject Matter

Claims 1-29 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record fairly shows or suggests all the process limitations as claimed. Specifically,

Re claims 1 and 20, none of the prior art of record discloses, in addition to other process steps or elements, the steps of: *forming a first hard mask on a portion of the patterned sacrificial layer defining a first exposed patterned portion, and forming a second hard mask on a portion of the second device layer defining a second exposed patterned portion; and etching the first exposed patterned portion and the second exposed patterned portion substantially simultaneously to the common layer defining a first stack comprising the first hard mask, a device-sized sacrificial layer, and a first device, and defining a second stack comprising the second hard mask and a second device.*

Re claim 11, none of the prior art of record discloses, in addition to other process steps or elements, the steps of: *forming a first hard mask on a portion of the patterned sacrificial layer defining a first exposed patterned portion, and forming a second hard mask on a portion of the second device layer defining a second exposed patterned portion; and etching the first exposed patterned portion and the second exposed patterned portion substantially simultaneously to the common layer defining a first stack comprising the first hard mask, a device-sized sacrificial*

layer, a device-sized etch stop layer, and a first device, and defining a second stack comprising the second hard mask and a second device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following references disclose teachings related to differential etching of semiconductor layers: U.S. patents to Kao '162, Cheng '071, Chang '251, and Jang '733; U.S. patent publication to Nam '234; and Japanese patent to Nagayama '732. However, none of the cited references discloses the inventive steps as listed above.
